1 🧵 Unlike the government, I DON'T think that you're stupid. I'm not going to gaslight you & hope that you begin to doubt reality.  
🔍 Forget the proximal origins for a sec & ask yourself- Where is all of this going?

**2** I've gone over a few key policies & actions like the 2004 Bio-Shield Act, The Prep Act, PHEMCE, etc. All vital. One I managed to miss was the 21st Century Cures Act, enacted in Dec 13. 2016 by then President Barack Obama,

**3** The 2016 Cures Act significantly altered the medical playing-field. It included: the Beau Biden Act, the BRAIN Initiative, 500 million to the FDA to remodel the medical records system, accelerated drug discovery,, redefined "EUA", & it gave \$6.3 billion to medical research!

4 Cures was enacted in the last 38 days of the Obama administration. The Beau Biden Act, also called the Cancer Moonshot Initiative received \$1.8bn of the funds to accelerate cancer drugs & research & VP Joe Biden was to oversee it effort & now, as POTUS, he still does.

Category	Total Awards	Total Dollars
Administrative Supplements	1	\$2,000.00
New Computing Award	1	\$1,000.00
Other Grants	40	\$16,332,538
<b>Total</b>	<b>42</b>	<b>\$16,332,538</b>

5 Another notable Cures Act policy were several changes surrounding Electronic Health Records [EHR] making them more digitally accessible across different platforms & locations. 1yr later Trump would reaffirm the US's commitment to health safety, via a nat'l security strategy.

The 21st Century Cures Act was signed into law on November 16, 2016. The act includes provisions regarding EHR and digital health records.

Under the act, providers will be able to use EHRs as a part of their electronic health records. The act also includes provisions to make it easier for providers to share information with each other. The act also includes provisions to make it easier for providers to share information with each other.

NATIONAL SECURITY  
STRATEGY  
of the United States of America

DECEMBER 2017

THE PRESIDENT OF THE UNITED STATES

COUNTERING CYBER THREATS

The United States must invest in and manage its cyberspace, defend its networks, and deter attacks. We must also work with our allies and partners to ensure a safe and secure cyberspace for all. By investing in our own cybersecurity, we can better protect ourselves and our partners from cyber threats. We must also work with our allies and partners to ensure a safe and secure cyberspace for all.

STRENGTHENING BORDER CONTROL

We must strengthen our borders to keep out illegal immigrants, terrorists, and other threats. This includes modernizing our border infrastructure, improving our intelligence-gathering capabilities, and increasing our law enforcement efforts. We must also work with our allies and partners to ensure a safe and secure border for all.

PRIORITIZING ACTIONS

We must take action to address the challenges we face. This includes investing in our economy, protecting our environment, and ensuring our national security. We must also work with our allies and partners to ensure a safe and secure world for all.

6  The Global Health Security Agenda (GHSA) was launched in 2014 by the CDC, WHO & others. In 2017, following the Cures Act, GHSA was expanded to include non-state actors. In 2018 the Global Preparedness Monitoring Board [GPMB] was formed also by WHO.

Global Preparedness Monitoring Board convenes for the first time in Geneva

GENEVA (10 September 2018) – The World Health Organization and the World Bank Group today convened the first meeting of the Global Preparedness Monitoring Board (GPMB), a new body set up to monitor the world's readiness for future health crises and advise governments on how to improve it.

The GPMB is chaired by Dr Gro Harlem Brundtland, former Prime Minister of Norway and former WHO Director-General and Mr Ashraf As Sayyid, Secretary General of the International Federation of Red Cross and Red Crescent Societies, and includes some of the most notable leaders in global health.

What is the connection between the USAID and the USAID?

USAID

The USAID is a U.S. government agency that promotes international development and democracy worldwide. It is the primary source of U.S. foreign aid and is responsible for administering various programs, including food assistance, economic development, and democracy promotion. The USAID has a long history of working with developing countries to help them achieve sustainable development and democracy.

It is the primary source of U.S. foreign aid and is responsible for administering various programs, including food assistance, economic development, and democracy promotion. The USAID has a long history of working with developing countries to help them achieve sustainable development and democracy.

What are some of the challenges that the USAID faces in achieving its goals?

USAID

The USAID faces several challenges in achieving its goals. One of the main challenges is the lack of resources, both financial and personnel. Another challenge is the political instability in many of the countries where the USAID works. The USAID also faces challenges related to corruption and inefficiency within some of the countries it works in. Additionally, the USAID must navigate complex political dynamics and relationships with other international organizations and governments.

Global Health Security Agenda - Wikipedia

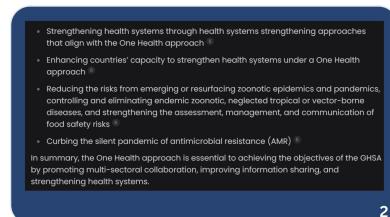

The Global Health Security Agenda (GHSA) is an international effort operating in the field of infectious disease preparedness. It is a partnership between the U.S. Centers for Disease Control and Prevention (CDC) and the World Health Organization (WHO). It was launched in February 2014 by a group of 44 countries [3] and organizations including WHO. [4]

7  While GHSA focused on international health regulations, & GPMB focused more on an international monitoring framework for preparedness a goal which GPMB implemented for the first time this year.

11. Bonus Earlier this week we saw the Covid-19 Origins Accountability Committee mention deep corruption in our Health governance & cited the Cures Act....

⚠ Correction\*\* ⚠ The video shows the House Energy and Commerce Committee hold a press briefing concerning HHS's governance not the Covid-19 committee. -My apologies for the mixup!
